Good reading, even tho' it didn't pertain to me muchBy Barbara RoseI enjoyed the book, but didn't relate to the women as much as I thought I was going to. I'm just a suburban housewife who worked as an administrative assistant in a nice government office for 30 years, as well as raising 3

boys. One year of college. Most of these ladies were well paid professionals who often went back to college, traveled extensively, volunteered for well known organizations, or kept working. They had artistic abilities, public speaking abilities, cool hobbies. Their outlook was from the perspective of ladies who were much better off than I. I will admit that there were lower paid ones, ones who were struggling with illness (one even died during the year that this book encompassed) and other people of my socio economic level. But for the most part, this book just wasn't "me". Most books I read several times. This one will go to the Half Price Book store after the first reading. 2 of 2 people found the following review helpful. Insightful By George S. Goldstone A Time of Our Own, is an insightful study of the "third third" of life. It summarizes interviews with women over sixty in a format that I found easy and enjoyable to read. I found the quotes and stories of these pioneering women both informative and inspiring. It's a must read if you plan on getting older (man or woman). ;-) After reading it I bought an extra copy for mom! Here's my favorite quote from a section titled "The Joy of Redefinition" in the second chapter. "This period of life is the time to do what I was meant to do." 0 of 0 people found the following review helpful. Great to be a Woman Over Sixty! By Nancy Saltzman I enjoyed every chapter of this book. Being over sixty, the third third of my life, is something to enjoy and celebrate. The authors are right, it is a "time of our own!"

A guide for women on the opportunities available in the "third third" of their lives.
