Philip H Pollock III : An SPSS Companion to Political Analysis before purchasing it in order to gage whether or not it would be worth my time, and all praised An SPSS Companion to Political Analysis:

3 of 3 people found the following review helpful. Easy to understandBy TashaThis book was very helpful for my class but the CD thing really became a fiasco. The book should really emphasize that you need to put the CD information on a flash drive. It told me to at one point but it did not seem that important. I lost the CD somewhere on campus and had to order this book again just for the CD info. Not fun.The book was great for the class and I used it more than the textbook it accompanied.0 of 0 people found the following review helpful. good introduction to scholarly researchBy Runamuckthis is a good book for those who want to understand what it takes to write a good scholarly work. the underpinings of statistics and how they are used. the only weakness is that there are times when even the most advanced student needs an teacher, why i give a four in stead of five stars. but it is still a wonderful resourced for all.0 of 0 people found the following review helpful. Missing PagesBy Sibul had a few pages missing from my workbook.

Be sure to skim through the book once it arrives!

In this much-anticipated revision of Pollock's popular SPSS workbook, students dive headfirst into actual political data and work with a software tool that prepares them for future political science research. Students learn by doing with guided examples, more than 120 screenshots, and step-by-step instructions. Compatible with all releases of SPSS (12.0 through 19.0, as well as the student version), the new fourth edition includes brand-new or completely revised exercises. Two new datasets (2008 NES and 2008 GSS) and two revised datasets (on the 50 states and on 191 countries of the world) feature an expanded number of variables to provide greater latitude for performing original analysis.

About the Author Philip H. Pollock III is professor of political science at the University of Central Florida. He has taught courses in research methods at the undergraduate and graduate levels for nearly 30 years. His main research interests are American public opinion, voting behavior, techniques of quantitative analysis, and the scholarship of teaching and learning. His recent research has been on the effectiveness of Internet-based instruction. Pollock's research has appeared in the American Journal of Political Science, Social Science Quarterly, and British Journal of Political Science. Recent scholarly publications include articles in Political Research Quarterly, the Journal of Political Science Education, and PS: Political Science and Politics.
