Archaeology in PracticeBy Sue CarterUsed for my uni studies, this book covers all aspects of archaeological analysis; including rock-art, stratigraphy, stone artefact analysis, absolute dating,animal bones, plant remains and more. It is well laid out and a great resource that I recommend for any student

studying archaeology. The chapters cover topics from Finding Sites to writing up the findings of your work. 'Producing the Record' has assisted me in writing since leaving uni. I recommend it for anyone in the archaeological field as a resource book. 0 of 0 people found the following review helpful. Must!! By rmsteph Great book. Smart and well written. 0 of 2 people found the following review helpful. Archaeology in Practice By Caroline I purchased this item on the basis that it was "new", however when I received it it didn't seem 100% new as the front page was slightly wrinkled. The inside seemed okay though.

Archaeology in Practice: A Student Guide to Archaeological Analyses offers students in archaeology laboratory courses a detailed and invaluable how-to manual of archaeological methods and provides insight into the breadth of modern archaeology. Written by specialists of material analyses, whose expertise represents a broad geographic range Includes numerous examples of applications of archaeological techniques Organized by material types, such as animal bones, ceramics, stone artifacts, and documentary sources, or by themes, such as dating, ethics, and report writing Written accessibly and amply referenced to provide readers with a guide to further resources on techniques and their applications Enlivened by a range of boxed case studies throughout the main text
