**From British Academy : Aspects of the Language of Latin Prose (Proceedings of the British Academy)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Aspects of the Language of

Latin Prose (Proceedings of the British Academy):

Twenty articles from two often dissociated areas of Latin studies, classical and medieval Latin, examine continuities and developments in the language of Latin prose from its emergence to the twelfth century. Language is not understood in a narrowly philological or linguistic sense, but as encompassing the literary exploitation of linguistic effects and the influence of formal rhetoric on prose. Key themes explored throughout the volume are the use of poetic diction in prose, archaism, sentence structure, and bilingualism. Papers cover a comprehensive range of material including studies of individual works, groups of authors such as the Republican historians, prose genres such as the ancient novel or medieval biography, and linguistic topics such as the use of connectives in archaic Latin or prose rhythm in medieval Latin. The diversity of approaches displayed from an international array of experts will make this an essential resource for all those interested in Latin language and literature.

About the Author Tobias Reinhardt is at Fellow and Tutor in Classics, Somerville College, University of Oxford. Michael Lapidge is at Emeritus Fellow, Clare College, University of Cambridge; Fellow of the British Academy.
