David C. Anderson : Assessing the Human-Animal Bond: A Compendium of Actual Measures (New Directions in the Human-Animal Bond) before purchasing it in order to gage whether or not it would be worth my time, and all praised Assessing the Human-Animal Bond: A Compendium of Actual Measures (New Directions in the Human-Animal Bond):

0 of 0 people found the following review helpful. Five StarsBy L. G. AllenExcellent book!!3 of 4 people found the following review helpful. Great starting pointBy Allison LakeWonderful starting point for creating measures and helps to explain some other anthrozoology studies that have been published.7 of 8 people found the following review helpful. Great summary of research and useful to have the toolsBy dog loverThis book is great in that it provides the

actual survey tools used to assess the human-animal bond, as well as references where to find where the tools have been used. Wonderful that this information can be found at your fingertips! Would appreciate clarification on whether we can freely use these tools. Highly recommend this book for anyone who wants to evaluate human-animal interactions, even in regards to other types of research, such as compliance in other aspects of veterinary medicine.

This book gathers, in one place, those measures presently used to study the human-companion animal bond. The measures chosen for inclusion are the most heavily used by researchers, as well as measures that appear to be innovative or relate to the different aspects of the human-companion animal relationship. The measures cover the human-animal bond principally by attachment, but also by fear, abuse, or neglect.

This book gathers, in one place, those measures presently used to study the human-companion animal bond. The measures chosen for inclusion are the most heavily used by researchers, as well as measured that appear to be innovative or relate to the different aspects of the human-companion animal relationship. The measures cover the human-animal bond principally by attachment, but also by fear, abuse, or neglect. David C. Anderson is the author of *Humans Other Species*, which was purchased by the American Veterinary Medical Association. Anderson, a retired librarian, continues to follow research in the field of human-animal studies and contributes a bibliographic column to the *International Society for Anthrozoology*. ed by Lisa Peacock, *The Latham Letter*
