Kenneth P. Katz : B-52G/H Stratofortress in Action (10207) before purchasing it in order to gage whether or not it would be worth my time, and all praised B-52G/H Stratofortress in Action (10207):

2 of 2 people found the following review helpful. A book for B-52 "Buffs"By MotownAn excellent, well-illustrated, and very informative source for aviation enthusiasts and modelers. This brief pamphlet is an excellent updated adjunct to Squadron/Signal's other books about the B-52.1 of 1 people found the following review helpful. Five StarsBy Bobby B HudsonExcellent0 of 0 people found the following review helpful. Five StarsBy fleet commamdergreat

More than any other weapon system, the legendary Boeing B-52 Stratofortress is the embodiment of American military power in the popular imagination. Perhaps the most impressive aspect of the B-52 has been its longevity. The B-52 first flew in 1952 and entered operational service with the U.S. Air Force in 1955. Boeing delivered the last B-52 in 1962. Five decades later, the B-52 remains in front-line service, most recently taking part in combat over Afghanistan and Iraq. Even more amazingly, current plans are for the B-52 to remain in service until 2040. This volume is packed with historical and recent photographs of the B-52, including some that were released by the U.S. Air Force and its contractors just for use in the book. As part of his research, the author flew on a B-52 training mission, and the flight report in this volume is the most detailed description of a B-52 mission ever published. Illustrated with color profiles, detailed line drawings, and over 190 photographs. 88 pages
