**Tim Deal, Michael De Bettencourt, Vickie Huyck, Gary Merrick, Chuck Mills : Beyond Initial Response: Using the National Incident Management System's Incident Command System** before purchasing it in order to gage whether or not it would be worth my time, and all praised Beyond Initial Response: Using the National Incident Management System's Incident Command System:

This book follows all NIMS ICS (National Incident Management System--Incident Command System) processes and principles. Beyond Initial Response was written to fill a significant gap in ICS training. Critical ICS position-specific

training is difficult to get, yet responders have the responsibility to effectively operate in an ICS organization. This book removes the gap, instills confidence, knowledge and assurance that is required to be successful in an ICS command. Major focus areas: 1) the ICS Planning Process discussed in extensive detail, 2) ICS positions (13 critical positions thoroughly covered in depth), and 3) Unified Command: what it takes to be successful. This book is an invaluable reference tool that contains numerous job aids, checklists, illustrations and sample documents enabling the user to seamlessly work within the Incident Command System. In addition, it is an excellent support source for ICS training, contingency planning and response operations. Beyond Initial Response should be within arms length whether you are training or deploying.
