Bullies take over some lives By larrynf Thank you RJ Parker for an informative book about bullies and the bullied. Many bullies watch to the weak and take over their life at school. As parents we need to watch for the signs many children don't come to their parents, we have to be alert. I recommend this book for everyone to read. Many turn to suicide, so sad parents to lose their children because of bullying. 1 of 1 people found the following review helpful. Great information By Tami M Faulk I liked this book. As an elementary school teacher I have seen quite a few instances of bullying. I like how RJ Parker points out the fact that not only does telling someone about being bullied help the victim, but it can also turn into a positive outcome for the bully themselves. Well written.

Most of the time, children don't even bother telling their parents that they are being bullied. This is because they do not want to be embarrassed before their parents. It is the innate nature of a child to make his parents proud, and when they find out that he is being bullied by another student, wouldn't the parents think that their child is not ready to stand up for himself? This is the first mistake that children make; not telling their parents. And this is what a bully thrives on. He knows that there's going to be no action against him. He knows that there isn't going to be anybody from a higher age group to stop him.

"It's no secret that bullying is a serious issue for today's youth. With newer technologies giving cyberbullies more tools to work with, and the terrifying reality of bullycide (children killing themselves after being bullied), it's important for parents to be in the know on this topic. This book may be brief, but it is jam packed with important info about the history and different types of bullying, as well as signs parents should keep an eye out for if they suspect their child may be being bullied!"
