**Ng Bee Chin, Gillian Wigglesworth : Bilingualism (Routledge Applied Linguistics Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Bilingualism (Routledge Applied Linguistics Series):

Bilingualism: introduces students to key issues and themes that include bilingual development and education; and the integration of social and cognitive perspectives uses tasks and examples to equip the reader with the necessary skills

and insights to assess and interpret research drawn from bilingual populations incorporates case studies drawn from a range of countries such as the United States, South Africa, the Netherlands, Morocco, and the People's Republic of China gathers together influential readings from key names in the discipline, including: Fred Genesee, Richard Bourhis, Elizabeth Peal, Wallace Lambert, Merrill Swain, Jim Cummins, and Ellen Bialystok. Written by experienced teachers and researchers in the field, *Bilingualism* is an essential textbook for students and researchers of Applied Linguistics. The accompanying website to this book can be found at <http://www.routledge.com/textbooks/9780415343879>.

"...this is the most accessible and useful introductory book on bilingualism since Francois Grosjean's (1982) classic. It is sure to stimulate the most apathetic undergraduate and fire up the imagination of the most exhausted graduate student. I plan on using it myself the next time I offer my Master's level course on Bilingualism" -- Alicia Pousada, *Linguist List*, June 2008
