**From Brand: Wiley-Blackwell : Blackwell Handbook of Social Psychology: Group Processes** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Blackwell Handbook of Social Psychology: Group Processes:

0 of 0 people found the following review helpful. A dense read By Lydia Lequesne This text is great. It's comprehensive and pretty thorough. It is super dense, making it hard to digest in one sitting. But, I recommend!

This handbook provides an authoritative, up-to-date overview of the social psychology of group processes. The topics covered include group decisions, juries, group remembering, roles, status, leadership, social identity and group

membership, socialization, group performance, negotiation and bargaining, emotion and mood, computer-mediated communication, organizations and mental health. Provides an authoritative, up-to-date overview of the social psychology of group processes. Written by leading researchers from around the world to provide a classic and current overview of research as well as providing a description of future trends within the area. Includes coverage of group decisions, juries, group remembering, roles, status, leadership, social identity and group membership, socialization, group performance, negotiation and bargaining, emotion and mood, computer-mediated communication, organizations and mental health. Essential reading for any serious scholar of group behavior. Now available in full text online via xreferplus, the award-winning reference library on the web from xrefer. "This book convincingly shows how the study of groups, particularly the interface of inter-group and intra-group processes, implicates such cognitive and intra-personal foci as attitudes, prejudice, and social cognition. At last we have an integrated volume which returns social phenomena to the intersect of personal and inter-personal processes. This is, or should be, the essence of social psychology, and this volume articulately reminds us that we and our social context (not our cognitive processes alone) determine our behaviour." --Martin Kaplan, Ph.D., Department of Psychology, University of California
