This Rescue Field Operations Guide has been prepared to guide Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) Rescue personnel during Federal disaster response operations. The National Urban Search and Rescue (USR) Response System provides for the coordination, development, and maintenance of the Federal effort with resources to locate, extricate, and provide immediate medical treatment to victims trapped in collapsed structures; and to conduct other life saving operations. This guide is designed to supplement the National USR Response System Field Operations Guide, September 2003 (USR-23-FG) which provides the USR Response System methods of operation, organization, capabilities, and procedures in mobilization, on-site operations, and demobilization. This guide provides a detailed reference for performing Rescue Operations.
