**Hazel Smith : North Korea: Markets and Military Rule** before purchasing it in order to gage whether or not it would be worth my time, and all praised North Korea: Markets and Military Rule:

9 of 10 people found the following review helpful. An honest and up to date look at the realities in North Korea By Jeremy Reimer The author presents a comprehensive history of North Korea based on verifiable and well-researched facts, and provides a glimpse at how the country changed after the famine of the 1990s. The book does not shy away from criticizing the Kim family dictatorship, but it warns against the simplistic view of North Korean citizens as being unified, brainwashed automatons. The reality is more subtle and more interesting. Recommended. 0 of 0 people found

the following review helpful. A good update of the outside world's knowledge built on extensive ...By Ingolf Kiesow Very detailed description of what is known today. A good update of the outside world's knowledge built on extensive collection of the scattered pieces of information that is allowed to trickle out of North Korea. It illustrates that in spite of the regime's effort to stop it more information is flowing out of the country than ever before. 0 of 0 people found the following review helpful. Very well researched and insightful; goes a long way ...By LK Very well researched and insightful; goes a long way toward dispelling the myths and stereotypes about North Korea and its leaders, replacing false assumptions with revealing and comprehensive analysis. This work is for serious students of North Korea.

In this historically grounded, richly empirical study of social and economic transformation in North Korea, Hazel Smith evaluates the 'marketization from below' that followed the devastating famine of the early 1990s, estimated to be the cause of nearly one million fatalities. Smith shows how the end of the Cold War in Europe and the famine brought radical social change to all of North Korean society. This major new study analyses how marketization transformed the interests, expectations and values of the entire society, including Party members, the military, women and men, the young and the elderly. Smith shows how the daily life of North Koreans has become alienated from the daily pronouncements of the North Korean government. Challenging stereotypes of twenty-five million North Koreans as mere bystanders in history, Smith argues that North Koreans are 'neither victims nor villains' but active agents of their own destiny.

"Hazel Smith's data-driven tour de force convincingly demolishes the cartoonish image of North Korea held by most outsiders, including senior policymakers in the West." Robert M. Hathaway, Woodrow Wilson International Center for Scholars, Washington DC "A timely and insightful analysis of the post-Cold War transformation of the North Korean society. This book challenges the stereotypes of many outside observers of North Korean affairs and provides important policy implications." Yoon Young-Kwan, Seoul National University, and former Foreign Minister of Republic of Korea "As an antidote to demonization the powerful impact of Hazel Smith's thought forces one to look at North Korea not as a pariah, but as a country struggling to pull itself out of international isolation." Donald P. Gregg, former US Ambassador to South Korea and Chairman Emeritus of The Korea Society in New York "North Korea is a no-nonsense book. The wealth of documents and statistics does much to buttress the analysis, and it is as good as any English-language book in providing an overview of contemporary North Korea. Smith's analysis of the pre-famine, Kim Il-sungist period is well grounded and clear sighted as she pays due attention to the historical, organizational, and ideological factors that molded the robust system." John Lie, Cross-Currents About the Author Hazel Smith is Director of the International Institute of Korean Studies at the University of Central Lancashire.
