1 of 1 people found the following review helpful. A child-appropriate way to introduce a difficult topicBy Kristen A. JensonI just read this lovely book Not For Kids and really enjoyed it. I didnt expect it to be a poem, but that turned out to be a comfortable way to approach an uncomfortable topic with kids. I liked that it was written from a childs point of view. And the illustrations were obviously made to remind us of a childs coloringvery nice touch!I love that the child is encouraged to choose what stays in her brain and empowered to return to a peaceful heart. This is a nice introduction to the message that some things on the internet are not for kids!Thank you Liz for all you are doing to help parents and teachers protect kids!

Milly loves to explore and learn. One day while using her friends phone, she sees images that make her feel sick. Milly was lucky to have a safe adult to help her through this experience and she now teaches children that some adult behaviours can be harmful for kids to see. Milly lets kids know that coming across these images is not their fault and she reminds them to always seek help from an adult if they see things that are not meant for kids eyes. - - - Not for Kids! is the perfect tool for parents to teach their children what to do if they are exposed to explicit content, and for parents to learn how to best help their kids cope with what theyve seen. In an era when online graphic and extreme depictions of adult behaviours are the default form of sex education, this book is a must-read with your kids! Kids!children's book is a fantastic for both parents and kids. I encourage the development of any resource which reinforces online safety messages, particularly around the importance of talking to trusted adults when they stumble across upsetting images or activities online.Milly's character provides kids with practical, actionable advice on where to go and what to do when they see or are shown adult content. The book is a great starting point for parents to have productive and supportive conversations with their children about both the positive uses and negative consequences of online content and activities. After all, education is key to a safer online experience for all our children.- Alastair MacGibbon, Children's eSafety Commissioner, Australian Government

From the Author

When I was six years old, I came across some images of naked people that I knew were not for me. The images swirled around in my mind and really troubled my heart for quite some time. These inappropriate pictures gave me a wrong idea about behaviours, relationships and even myself.I often wonder if things would have been different for me, if as a six year old I had talked to a trusted adult and asked for help. At the time however, I thought that by telling someone else, it would be me who got into trouble and I wasn't even sure anyone would have understood. How very wrong I was. As it turns out, asking for help would have been the very best thing I could have done.
