**Riki Ott, Paul Carvalho, Robert Cornellier : Not One Drop Black Wave (Book DVD Bundle)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Not One Drop Black Wave (Book DVD Bundle):

This DVD/book package should be read and viewed by everyone concerned with crimes against man and nature; about corporate lies and the value of community. Betrayed by oilmen's promises in the 1970s, the people of Prince William

Sound, Alaska, awaken on March 14, 1989, to the nation's largest oil spill. *Not One Drop* is an extraordinary tale of ordinary lives ripped apart by disaster and of community healing through building relationships of trust. This story offers critical lessons for a society traumatized by political divides and facing the looming catastrophe of global climate change. Author Riki Ott, a rare combination of commercial salmon "fisherm'am" and PhD marine biologist, describes firsthand the impacts of oil companies' broken promises when the Exxon Valdez spills most of its cargo and despoils thousands of miles of shore. Ott illustrates in stirring fashion the oil industry's 20-year trail of pollution and deception that predated the tragic 1989 spill and delves deep into the disruption to the fishing community of Cordova over the following 19 years. In vivid detail, she describes the human trauma coupled inextricably with that of the sound's wildlife and its long road to recovery. *Black Wave* (DVD) - directed by Robert Cornellier, tells the story of the biggest environmental catastrophe in North American history. In a flash, dramatic images shoot across the planet. They show thousands of carcasses of seabirds and sea otters covered in oil. A thick black tide rises and covers the beaches of once-pristine Prince William Sound. For twenty years Riki Ott and the fishermen of the little town of Cordova, Alaska have waged the longest legal battle in U.S. history against the world's most powerful oil company - ExxonMobil. They tell us all about the environmental, social and economic consequences of the black wave that changed their lives forever. *Not One Drop* and *Black Wave* show us how too many corporate owners and political leaders betray everyday citizens and how a community forges a new path from despair to hope.

About the Author Marine oil pollution expert Riki Ott, PhD, was on the scene before, during, and after one of the biggest environmental disasters in the United States--the Exxon Valdez oil spill. A former commercial salmon "fisherma'am" in Prince William Sound, she experienced firsthand the spill's effects, including environmental devastation, economic losses to the fishing industry, and psychosocial trauma to the close-knit community. 1993's spill-related salmon- and herring-population collapses prompted Ott to retire from fishing and found three nonprofit organizations to deal with the area's lingering social, economic, and environmental harm. A popular and dynamic lecturer, her talks weave the legacy of the Exxon Valdez spill into current issues of public health, environmental pollution, and our energy future--and inspire individuals to take action. Writer, director, editor and producer Robert Cornellier made his documentary film debut in 1978. In 1995, with Patricio Henriquez and Raymonde Provencher, he formed the independent film production company Macumba International. In the ten years that followed, Robert co-produced and directed over twelve documentaries in the successful *Living in the City* series and *eXtremis* series. In 2008 he completed *Black Wave: The Legacy of the Exxon Valdez*, a feature film that focuses on the worst environmental disaster in North America: the Exxon Valdez oil spill.
