From Ingramcontent : Operating Grants for Nonprofit Organizations before purchasing it in order to gage whether or not it would be worth my time, and all praised Operating Grants for Nonprofit Organizations:

Leaders of nonprofit organizations that oversee programs in the arts and culture, community and economic development, social services and more will be able to search more than 1,850 funding sources to pay for operating costs in this updated directory. Each record is listed in three indices: by subject, by program type and by geographic focus. Each record includes the grant title; amount of funding; description; application requirements; application deadline; contact information, including Internet address, email, phone number, fax, sponsor name and physical address; and samples of awarded grants, when available. The directory also includes an article written by Schafer,

"How to Write a Winning Grant," which outlines key steps to prepare a grant proposal.
