The book is a very general overview of the fact that there are aging jobs-- in other words, no new information for anyone over the age of 14.The "up to date salary statistics and earning potential" information advertised on the cover consists of the author saying that there is a broad range of earning potential.The "essential advice from the experts" consists of a reference list at the end.Very poor book-- the worst example I can remember of advertising far exceeding content.3 of 4 people found the following
