J. E. Rowley, John Farrow : Organizing Knowledge: An Introduction to Managing Access to Information before purchasing it in order to gage whether or not it would be worth my time, and all praised Organizing Knowledge: An Introduction to Managing Access to Information:

1 of 1 people found the following review helpful. I am not one to return to the assigned reading ...By NicoleI am not one to return to the assigned reading two or three times, but I am taking an "intro to cataloging" class and I find myself

paging through this book every day. It will save your life.0 of 0 people found the following review helpful. It is an excellent resource and I plan to keep it for reference ...By KatThis book was required reading for a class. It is an excellent resource and I plan to keep it for reference in my own home library. I'm sure I will return to it many times during the course of grad school.0 of 1 people found the following review helpful. okBy Lisaneeded to buy this book for class. the material is very dense, and i sometimes tell the authors to speak in English. i would not buy it if it was not for my class

For its third edition, this text on knowledge organization and retrieval has been revised and restructured to accommodate the increased significance of electronic information resources. With new sections on topics such as information retrieval via the Web, metadata and managing information retrieval systems, the book explains principles relating to hybrid print-based and electronic networked environments experienced by today's users. The book is an accessible introduction to knowledge organization for both undergraduate and postgraduate students of information management and information systems.

'...can be recommended for any library and information science collection...' Canadian Library Association '...deserves to retain its place as a key introductory textbook in this subject...' Aslib Program 'Organizing Knowledge is in its fourth edition for a good reason. The technology and systems surrounding the topic continue to evolve.' Library Management, Vol 30, No 3About the AuthorJennifer Rowley is Professor of Information and Communications at Manchester Metropolitan University and Richard Hartley is Professor of Information Science at Manchester Metropolitan University, UK.
