By ExcetralA well written and meticulously reseached study of the relationships and principles that led to the growth and prominence of the Spelman and Morehouse Colleges and the Atlanta University system. Excellent character studies of John D. Rockefeller and John Hope and their respective commitments to philanthropy and higher education. A must read.

By Houston DIYerGreat read. Well done breakdown of historical philanthropy bridged to today's more contemporary complex giving environment. Strongly Recommend this reference.

Analyzing the circumstances surrounding the creation and development of the Atlanta University System, this book shows how philanthropists' positive involvement created a unique higher educational center for black Americans that exists nowhere else in the nation.

"The story of black higher education in the late nineteenth and early twentieth centuries the leaders that envisioned it and the philanthropists that supported it is a complex one that needs to be told. Thank you, Vida L. Avery, for telling it so well!" Beverly Daniel Tatum, President, Spelman College, USA
