Robert S. Rycroft : The Economics of Inequality, Discrimination, Poverty, and Mobility before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Economics of Inequality, Discrimination, Poverty, and Mobility:

4 of 5 people found the following review helpful. What an awesomely pleasant surprise! By P. Wiedemer EIDPM is a cross between an easy to read non-fiction work and a comprehensive textbook that does extraordinary justice to complex subject matter! Rarely do you find an author who can remain objective when delving into so many controversial topics and infuse life into potentially dry material!! Dr. Rycroft does an exemplary job of providing

balanced examinations of socially charged theories. He provides interesting-and-extensive as well as quantitative-and-qualitative treatments that can satisfy both the casual reader and the "think tank" researcher. This work is well researched, well written and well received! I can highly recommend it to anyone!!!

Thoroughly classroom tested, this introductory-level text surveys what economists have to say about inequality (or income and wealth distribution), poverty, mobility - both intragenerational (within careers), and intergenerational (between generations) - and discrimination (on the basis of race, ethnicity, age, gender, and many other factors) in the United States. This text brings the undergraduate treatment of these issues up-to-date, featuring detailed, but not mathematical, examination of the economic theory underlying the analysis. There is a greater emphasis on mobility, on wealth accumulation, distribution and inheritance, and on discrimination law than in other texts. The author provides full and fair treatment of competing sides in several of the controversial issues in the field, written in such a way that instructors can use the text material to motivate a variety of classroom discussions. An Instructor's Manual featuring solutions to the end-of-chapter questions is available online to adoptors.

About the Author Robert S. Rycroft is Professor of Economics at the University of Mary Washington, USA and is currently completing his 40th year on the faculty. He teaches courses in Poverty, Affluence and Equality, Labor Economics, Public Finance, and Microeconomics.
