Paul Knox, John Agnew, Linda Mccarthy : The Geography of the World Economy before purchasing it in order to gage whether or not it would be worth my time, and all praised The Geography of the World Economy:

0 of 0 people found the following review helpful. Vague ContentBy Utah UteUsed this book for a Economic Geography course. I felt the course was too vague as this is becoming a big subject in universities now. You'll learn a lot of this stuff in basic history, sociology and philosophy classes. Overall i give this book a C grade.... as it is super boring and vague.1 of 1 people found the following review helpful. For the globally conscious student.By J. SpinellaGreat textbook, makes a thorough understanding of the foundations for the fiscal dimension of the world, from past to present and exploring potentials of the future with a change of conduct and technology on a global stage.1 of 1 people found the following review helpful. Four StarsBy Alexander FetisovVery helpful in teaching and up to date.

The Geography of the World Economy provides an in-depth and stimulating introduction to the globalization of the

world economy. The book offers a consideration of local, regional, national and global economic development over the long historical term. The theory and practice of economic and political geography provide a basis for understanding the interactions within and among the developed and developing countries of the world. Illustrated in color throughout, this new edition has been completely reworked and updated to take account of recent significant changes in the world economy. A new companion website also accompanies the book, with additional resources for each chapter including multiple choice and short essay questions and links to relevant websites. Figures and tables are also available for download located at www.routledge.com/cw/knox The text is signposted throughout with an glossary of key terms, and is richly illustrated with full-color maps, diagrams and illustrations. It is ideal for upper level university undergraduates and for post-graduates in a variety of specializations including geography, economics, political science, international relations and global studies.
