Dean Henderson : The Grateful Unrich: Revolution in 50 Countries before purchasing it in order to gage whether or not it would be worth my time, and all praised The Grateful Unrich: Revolution in 50 Countries:

The second half was boring, repetitive and self-indulgent. He uses the word "oligarchy" about 87000 times throughout the book and is obsessed with coffee. I also find it highly hypocritical - he jet sets around the world to hang with "God's chosen people - the global poor", and

yet in every place he goes to, he bargains down all their prices. Arguing prices with the people that can least afford it on this planet while pretending to be one of them and putting himself above any other traveller out there. He did highlight some political and economic atrocities around the world that I was not aware of but his account of South Africa contains 9 incorrect references and/or spelling mistakes. If he got that stuff wrong, how much other stuff in this book is wrong. And after all that, the book just ends. Disappointing, I don't really recommend it. 6 of 9 people found the following review helpful. Excellent book meaningful awesome energy stories! By Jimmy If you want to experience the true life this is the book actual facts Thank you Dean Henderson what a great book~

Covering fifty countries on six continents over a twenty-year span- Henderson asks the hard social, political and economic questions while vagabonding his way around the world. Invoking the wit and humor of Twain and the curiosity of Kerouac- Henderson discovers himself, humanity and revolutionary politics through prolonged contact with God's chosen people - the global poor.
